SYSTEM CONTROLLER	CONTROLLER	THE FALCON XT	AUGUST 22, 2018

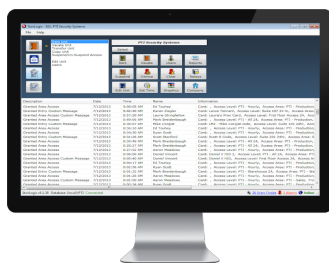

INTEGRATED SOLUTIONS

Products and services from PTI Security Systems can be configured to address every facility's unique requirements.

Expand on the value of the FalconXT controller and StorLogix software with other PTI solutions such as :

- Wireless door alarms to further illustrate the exact status of every door in the facility
- Gate operators to automate entry and exit, control traffic flow, and provide authorized access.
- Site Assistant, for at-a-glance visibility to the status of the site.

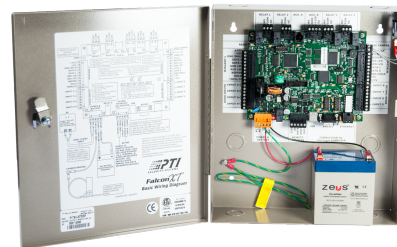

StorLogix Software is a Windows®-based solution that is fully integrated with the FalconXT system controller as an easy-to-use configuration and management tool. Now available on USB for easy installation, the graphical software facilitates the setup process for access areas, times, monitoring zones, alarms, and site activity.

SYSTEM FEATURES

- E-mail alert notifications.
- Ability to centralize all your site data.
- Connect to system via TCP/IP both locally and/or remotely.
- Hundreds of system messages that are customizable to your facility.
- Support for as many as 6,000 units and 8,000 users.
- Support for remote annexes with dial-up modems with automated sharing of a single connection.

SYSTEM CAPABILITIES

- On-board Ethernet, USB and RS-232 connectivity.
- Storage of up to 30,000 events in safe, non-volatile memory.
- Two industry standard Wiegand inputs.
- 12V DC power supply on board with battery backup.
- Hundreds of configurable access levels and time schedules.
- LogixScript capabilities for customizable configuration options.
- Thousands of flexible input and output points for end-to-end solutions.

The FalconXT system controller integrates all functions for securing and monitoring the facility. It supports as many as 127 RS485 devices, eight supervised inputs, two industry standard Wiegand devices, and four dry-contact relays. On-board Ethernet connection provides TCP/IP communication with a host computer.
