

COMMERCIAL HYDRAULIC VERTICAL LIFT GATE OPERATOR

HIGH-SECURITY · HIGH-DUTY · AMERICAN ENGINEERED

OVERVIEW

PRODUCT DESCRIPTION

Solid Rock Automation's Commercial Hydraulic Vertical Lift Gate Operator is engineered for high-duty, high-security applications requiring reliability, precision, and long-term durability. Designed and manufactured in the U.S.A., each operator and gate is powder-coated and built to meet UL325 safety standards.

SOLID ROCK AUTOMATION — COMMERCIAL HYDRAULIC LIFT GATE OPERATOR

KEY FEATURES

STANDARD EQUIPMENT

- **Touchscreen Display** — Diagnostics, I/O status, and scheduled gate operations
- **Hydraulic Lift System** — Spring-assisted for smooth, controlled operation
- **Danfoss Microcontroller** — Modern intelligent control
- **Real-Time Encoder Tracking** — Continuously monitors gate position for accuracy and safety
- **Standard Safety Package** — IRB 325 photo eye kit and Sentri safety edge
- **Standard Access Package** — LiftMaster 860LM receiver with two 811LMX remotes included
- **Power System** — 110V input; operates on 12V DC internally
- **Backup Storage** — Integrated 200Ah battery for operations during power outages
- **Counterbalance Valve** — Gate moves only when hydraulic pressure is present; prevents uncontrolled movement if a hydraulic line is compromised

SOLID ROCK AUTOMATION — CONTROL UNIT DETAIL

CONSTRUCTION & FINISH

BUILD QUALITY

GATE STRUCTURE	Fully welded aluminum construction
FINISH	Powder-coated in-house; all components
WEATHERPROOFING	Designed for long-term outdoor exposure
CONNECTORS	Environmentally sealed Deutsch connectors throughout
GATE CAPACITY	Aluminum commercial gates up to 25 ft; steel gates up to 20 ft
BIAS MOUNT	Can be built on a bias to match the slope of a driveway

OPTIONAL UPGRADES

CUSTOMIZATION & ADD-ONS

Wired Through-Beam Photo Eye	Wireless Photo Eye	Wireless Virtual Safety Loops
Inductive Loops	Custom Gate Colors & Designs	Keypads & Card Readers
Cellular Modem — Remote Access & Diagnostics		

INSTALLATION REQUIREMENTS

FOUNDATION & SITE PREP

CONCRETE STRENGTH	3,000 PSI minimum
FOUNDATION HEIGHT	Flush with top of asphalt/roadway
GATE CLEARANCE	3¼" gate-to-ground maintained
ANCHOR HARDWARE	Six 5/8" × 7" galvanized wedge anchors, min. 4" embedment
SITE DRAINAGE	Well-drained with compacted aggregate base required

WHY CHOOSE US

THE SOLID ROCK DIFFERENCE

- **Proven Durability** — Every operator is built and tested in-house before shipment
- **Hydraulic Safety** — Counterbalance valve ensures gate security even under hydraulic failure
- **Smart Controls** — Touchscreen with diagnostics, I/O status, and scheduled operations
- **Custom Fabrication** — Gates built on a bias to accommodate sloped driveways or uneven terrain
- **Remote Support** — Live diagnostics and tech adjustments via optional cellular modem

SITE LAYOUT

CONDUIT & INFRASTRUCTURE NOTES

CONDUIT	PURPOSE
3/4" x 8 runs	Loops, photo eyes, communication, power & keypads
Dual Operator	Coordinated communication conduit between primary & secondary units
Pad Sizing	Per operator type: left, right, or dual configuration

Dual-operator systems require coordinated communication conduit between primary and secondary units. Concrete pad dimensions are determined by operator type and configuration.

OPERATOR-ONLY PROGRAM

BUILD YOUR OWN GATE

Solid Rock Automation offers our hydraulic vertical lift gate operator as a standalone unit — a turnkey solution for gate fabricators and dealers who want to build and install their own gate on our platform.

- **Operator-Only Supply** — Purchase our operator independently and mount your own custom gate to our hydraulic system
- **Full Turnkey Setup** — Includes the same standard and optional upgrades available with our complete gate packages
- **Optional Gate Hinges** — Aluminum or steel hinge hardware available that bolts directly to our lift arm, simplifying your fabrication process
- **Your Gate, Our Power** — Design and build to your specifications while leveraging our hydraulic operator, controls, and backup power system

WHY SOLID ROCK

BUILT DIFFERENT

- **American Made** — Designed, fabricated, and finished in the U.S.A.
- **In-House Powder Coating** — Every component finished under one roof for consistent quality
- **Modern Controls** — Danfoss microcontroller technology vs. outdated ladder logic systems
- **Engineered Redundancy** — Integrated backup power, real-time encoder tracking, and sealed connectors
- **Direct Support** — Remote cellular diagnostics and live tech adjustments available on commercial units

APPLICATIONS

IDEAL FOR

Commercial/Industrial Facilities

Government & Military

Data Centers
